GlassWorm malware just exploited Solana dead drops to deliver RAT to our customers.

Tracking this campaign's multi-stage framework reveals alarming data theft capabilities: browser and crypto data are going missing.

LeakBase admin arrest in Russia won't stop this threat; they're still spreading malware.

GlassWorm malware bypasses defenses easily – are you waiting for the next patch cycle to apply fixes or patching right now?

I want to see your top SIEM tools catch this backdoor in real-time. #GlassWorm #Solana #DFIR | 🔍 Source:
