

Zero-day exploits are here. Every major OS and browser is vulnerable. Anthropic's Mythos Preview model just found and exploited them. That's a wake-up call. Autonomous discovery is a major concern. Palo Alto Networks' Wendi Whitmore says similar capabilities are coming. Post-alert gap needs attention. Are you patching immediately or waiting? Rethink MTTD. Reduce the gap. 📰 Source: <https://thehackernews.com/2026/04/your-mttt-looks-great-your-#ZeroDayExploits #PostAlertGap #MTTD>
