

****Breach happens**** ****Zero Trust**** is not just for enterprises. It's essential. Small teams get breached too. The ****Sfedfcv/redesigned-pancake**** repository on GitHub has 240 stars, with 80 issues and 35 pull requests. This tool can be the weakest link. ****Zero-Trust**** architecture is necessary for all organizations. I've seen it firsthand. Our team implemented ****Zero-Trust**** to protect sensitive data. Last week, we detected a suspicious login attempt. Our ****Zero-Trust**** system blocked it immediately. We use tools
