

****Breach Alert**** ****Signal**** is compromised. Russian hackers target Signal accounts, coaxing victims into handing over their ****Signal Backup Recovery Key****. This allows hackers to restore backups and read sensitive info. They use ****social engineering****. ****FBI**** and ****CISA**** warn of evolving tactics. Our team recently helped a client who fell victim to a similar phishing attack, containing the damage and negotiating with attackers, where human error played a role. We used ****chenjj/espoofer**** (1726) to test email
