

****Zero-Day Alert**** Microsoft confirms ****CVE-2026-50656****. It's a privilege escalation flaw with a CVSS score of 7.8, codenamed ****RoguePlanet****. This vulnerability allows attackers to escalate privileges and gain further access to a system. No defense is foolproof, and attackers can bypass defenses, leaving us vulnerable. Our team saw an attacker move laterally, gaining a foothold, but we contained the damage by poring over logs and analyzing the attacker's TTPs. Automated threat detection helps, and
