

****Data Breach**** ****Vulnerabilities abound****. The ****Copilot 'SearchLeak' Attack**** exploited a three-stage vulnerability, which was patched recently. ****Zero-Trust**** architectures are not enough, as our team saw with a client who fell victim to a similar attack despite having ****Zero-Trust**** in place. Regular VAPT and ****DevSecOps**** integration are essential, as tools are only as good as the people behind them. A security practitioner I worked with had to deal with the aftermath of such an attack and emphasized the importance
