

****Cyber Attacks**** 15,000 WordPress sites fell.
****CVE-2026-20253**** was exploited. Patching is not simple. Delays happen. Systems are complex.

Our team saw this. A client was breached. Prompt patching is key. **INC Ransomware** targets healthcare. They exploit humans. Urgency is their tool.

Employee education matters. Phishing attempts work. Even strong systems fall. Train your employees.

--- Tool: r00th3x49/ghauri (4032) detects SQL injection flaws. It's a valuable tool. Use it to strengthen defenses.

****You will be breached**** within 18 months if you don't patch and train.  Source:
